Our Company

We have a 65 year manufacturing heritage, 55 of those years in furniture. For the past 50 years, three things have set us apart from any other company in the conference and banqueting market: 'Quality, Innovation and Value for Money'. This focus has enabled us to supply time and time again, some of the best hotels in the world, with the highest quality products, incorporating the best comfort and design, all at a price that you can afford. If you are attending a presentation in an auditorium, attending a conference or a dining function, if it's Burgess Furniture your comfort will be assured.

Jeremy Burgess ~ Chairman

History

It started with a bicycle handlebar in 1946 when Jeremy's father, Gerald, founded the GB Cycle Company. Spotting a growth opportunity, he soon steered the company towards the burgeoning contract furniture market, adapting the bending, welding and aluminium finishing expertise of the company to the design and manufacture of quality conference and banqueting furniture. And the rest, as they say, is history...

Burgess Furniture were the very first European manufacturers of the aluminium stacking banquet chair! That was our first innovation and since then we have continued to be at the forefront of the ideas that have helped set the industry standards. The nylon flock coated banquet table, the versatile easy to store, flip-top conference table, ergonomics excellence awards for our Allday™ and Orvia chair designs and a design excellence award for our Flair conference chair are just some examples of the standards of excellence that Burgess Furniture has achieved.

Listening to our customers' needs and then working together to create bespoke design solutions has always been key to our success. The company has established an industry wide reputation as an innovator, a great example of which is the development of the Allday™ ranges of chairs, ensuring that the user can be comfortable from early morning to last thing at night. One of our newest chairs, The Mendola, incorporates the patented ProBax® Seating Technology is the latest addition to the Burgess Ergonomic Chair Range. We are very proud of the fact that our products are still designed and more importantly, manufactured on site in the UK, where everything started all those years ago. We use our own special and unique grade Aluminium Alloy, which ensures our chairs are as strong as Steel but also as light as possible.

We are now delighted to be able to offer an extensive range of soft seating and casual meeting room furniture.

*We are proud of our heritage,
and proud to still be a family
owned and run company.*

Burgess Ethos

- Burgess is still a family owned and run company
- Burgess has a 65 Year Manufacturing Heritage
- All items are still manufactured on site in the UK
- We employ skilled and experienced staff; many of whom have been with us for more than 25 years
- We use the latest technology to make our products
- We use premium grade materials; from our seat foams to the plywood seat inserts
- We use our own special and unique grade Aluminium Alloy
- Our chairs are incredibly light and durable
- Each chair is Quality Checked to the highest standards
- All products are independently tested to the highest industry standards
- The company holds both ISO 9001 and ISO 14001 Certificates
- All the fabrics used on our chairs satisfy the highest fire retardant standards
- All our products retain the inherent strength for which Burgess Products are renowned, the world over

HENRAYHB2

HENRAYT

HENRAYCLB

HenRay

Designed by Henry Gurney

HenRay is a sharp and stylish range of soft seating. High back units offer comfort and privacy and suite perfectly with low back seating, benches and tables. Curved modules and booths complete the extensive collection to create large landscape configurations ideal for meeting and public spaces.

Features

- 28 modular units
- Fully webbed seat
- Modular units can create large landscapes or small informal meeting areas
- Available in fabric and vinyl, with two-tone options
- Aluminium or white powder coated legs
- Power and audio visual options

Dishy

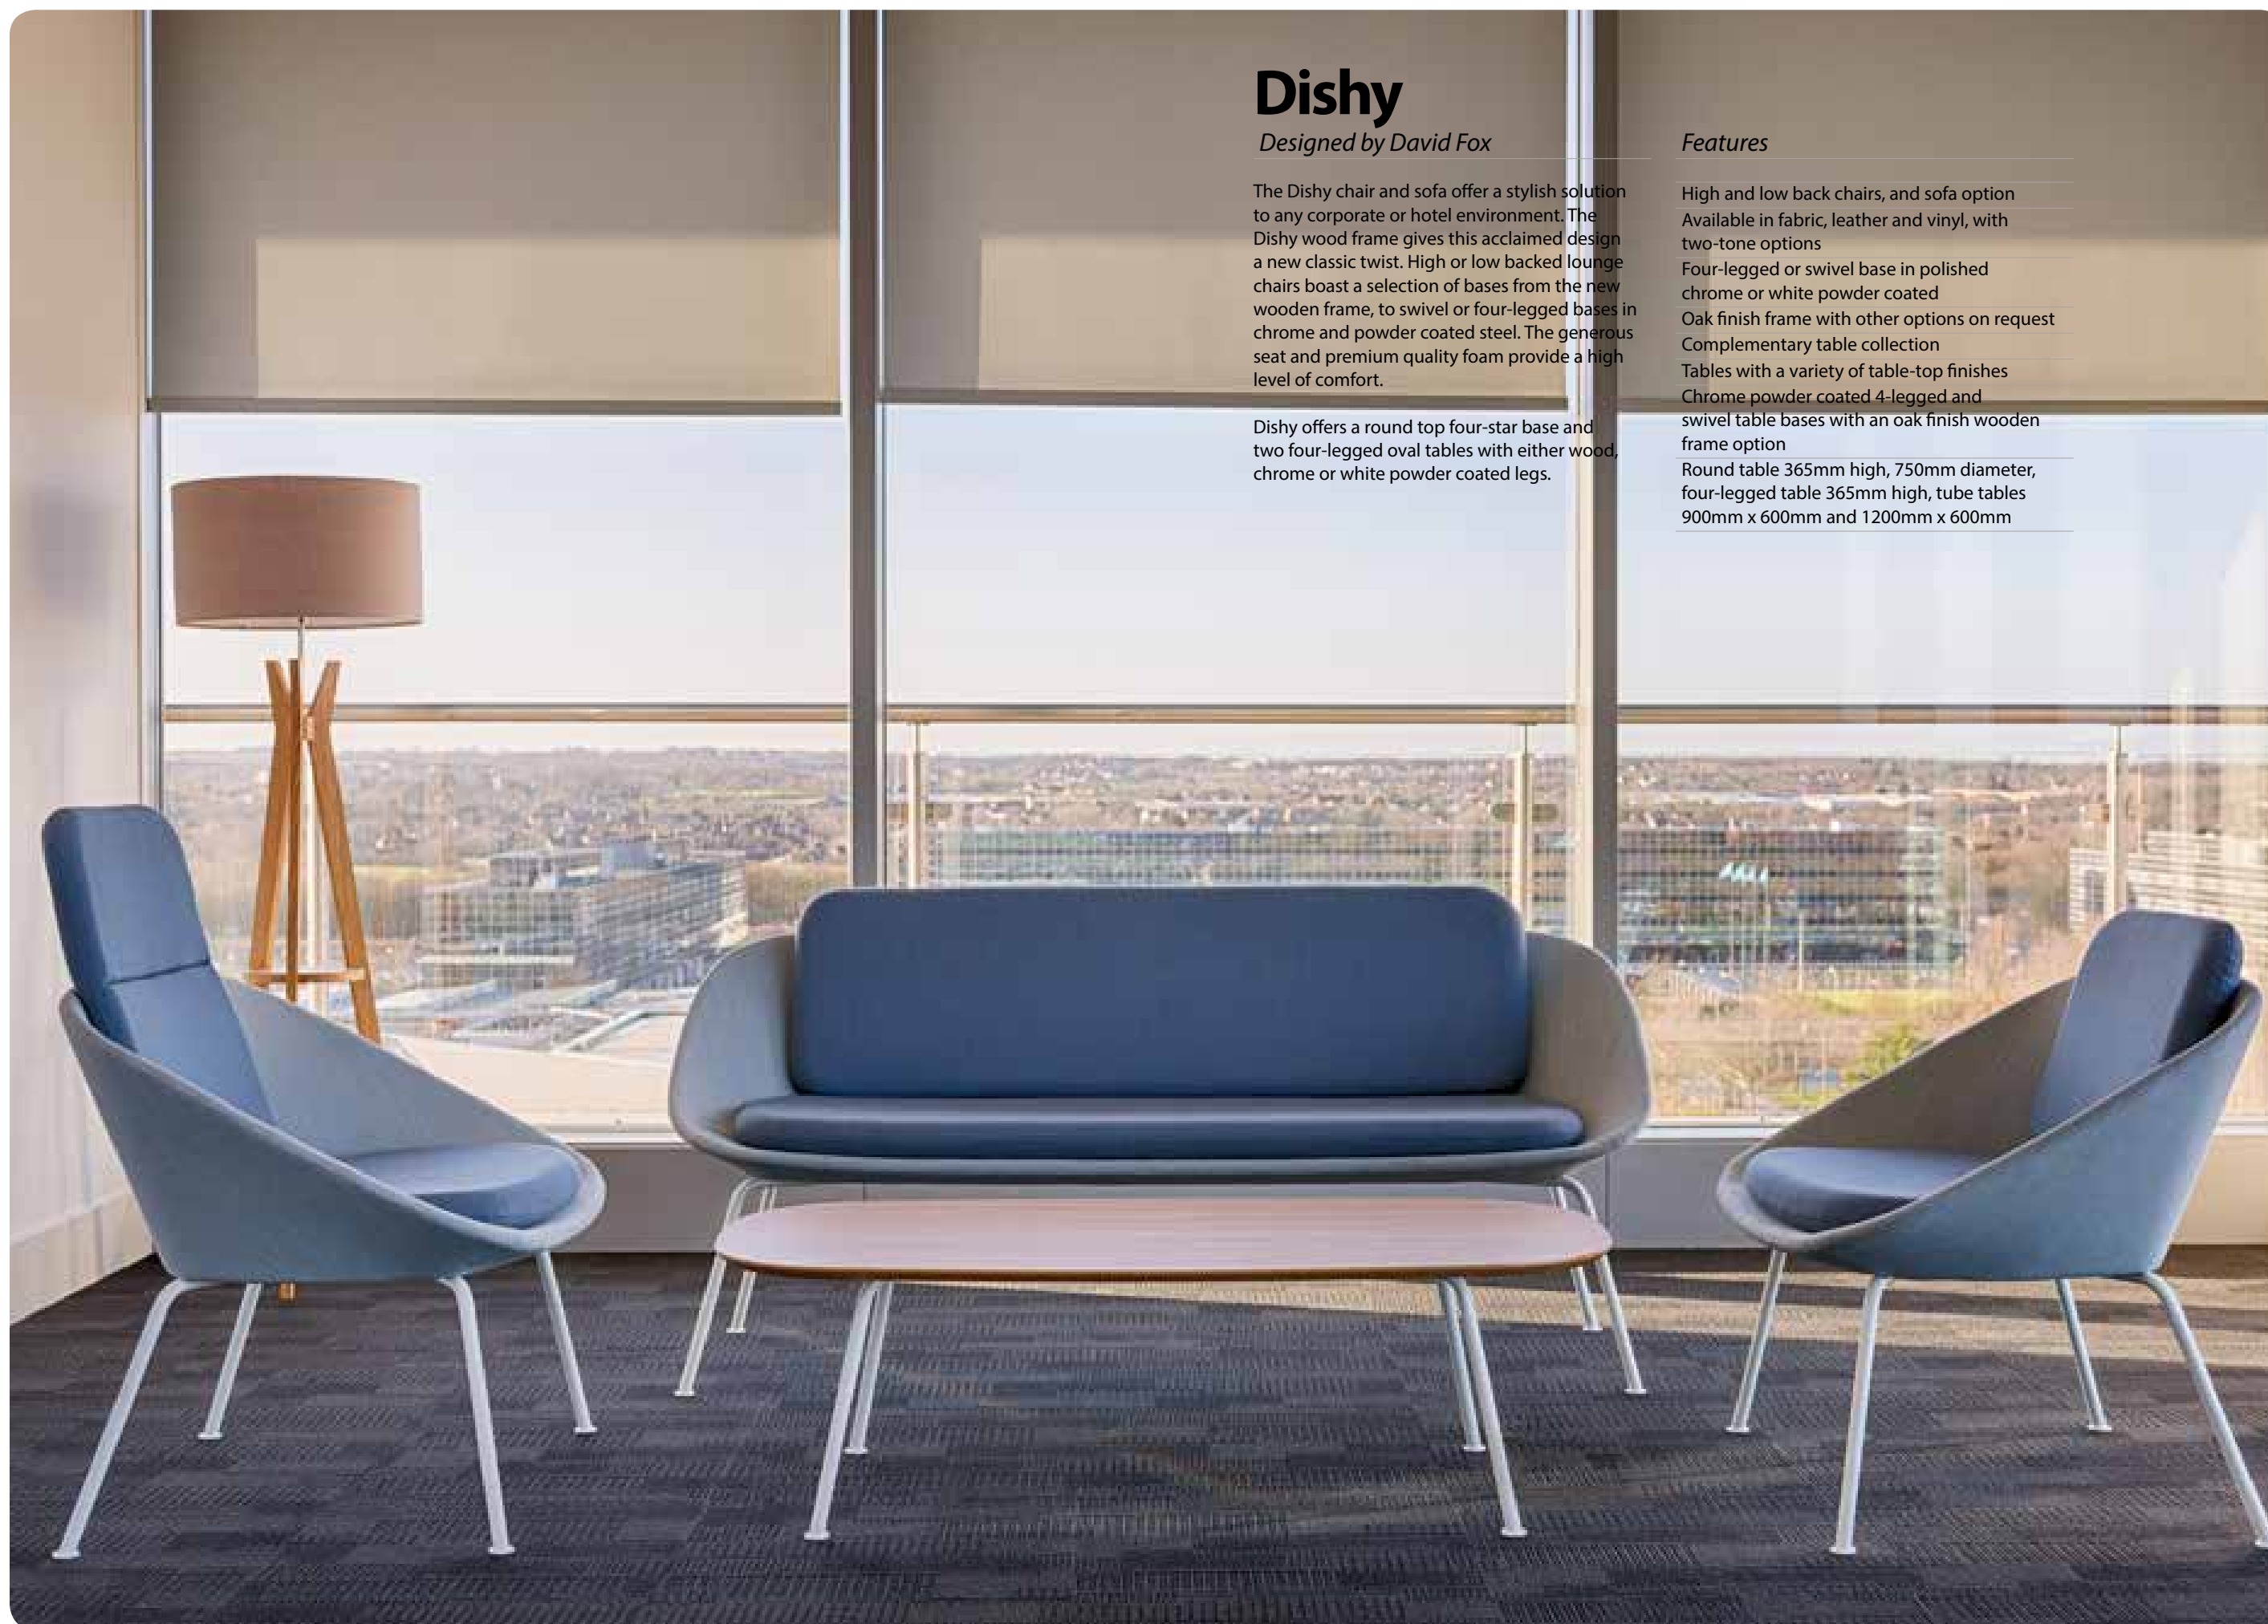

Designed by David Fox

The Dishy chair and sofa offer a stylish solution to any corporate or hotel environment. The Dishy wood frame gives this acclaimed design a new classic twist. High or low backed lounge chairs boast a selection of bases from the new wooden frame, to swivel or four-legged bases in chrome and powder coated steel. The generous seat and premium quality foam provide a high level of comfort.

Dishy offers a round top four-star base and two four-legged oval tables with either wood, chrome or white powder coated legs.

Features

High and low back chairs, and sofa option
Available in fabric, leather and vinyl, with two-tone options
Four-legged or swivel base in polished chrome or white powder coated
Oak finish frame with other options on request
Complementary table collection
Tables with a variety of table-top finishes
Chrome powder coated 4-legged and swivel table bases with an oak finish wooden frame option
Round table 365mm high, 750mm diameter, four-legged table 365mm high, tube tables 900mm x 600mm and 1200mm x 600mm

OCCAV

O'cee

Designed by David Fox

O'cee offers a thoroughly modern twist with its striking profile and generous chrome legs. The free-standing modular units create a multitude of configurations to provide any reception or breakout area with a unique and distinctive style.

Features

- Concave, convex and 1600mm and 1200mm straight free-standing modular units
- Available in fabric and vinyl
- Chrome legs
- Complementary Asteroid table with coordinating fabric cut-outs
- Complementary O'val tub chair and stool

OVAL1

OVAL2

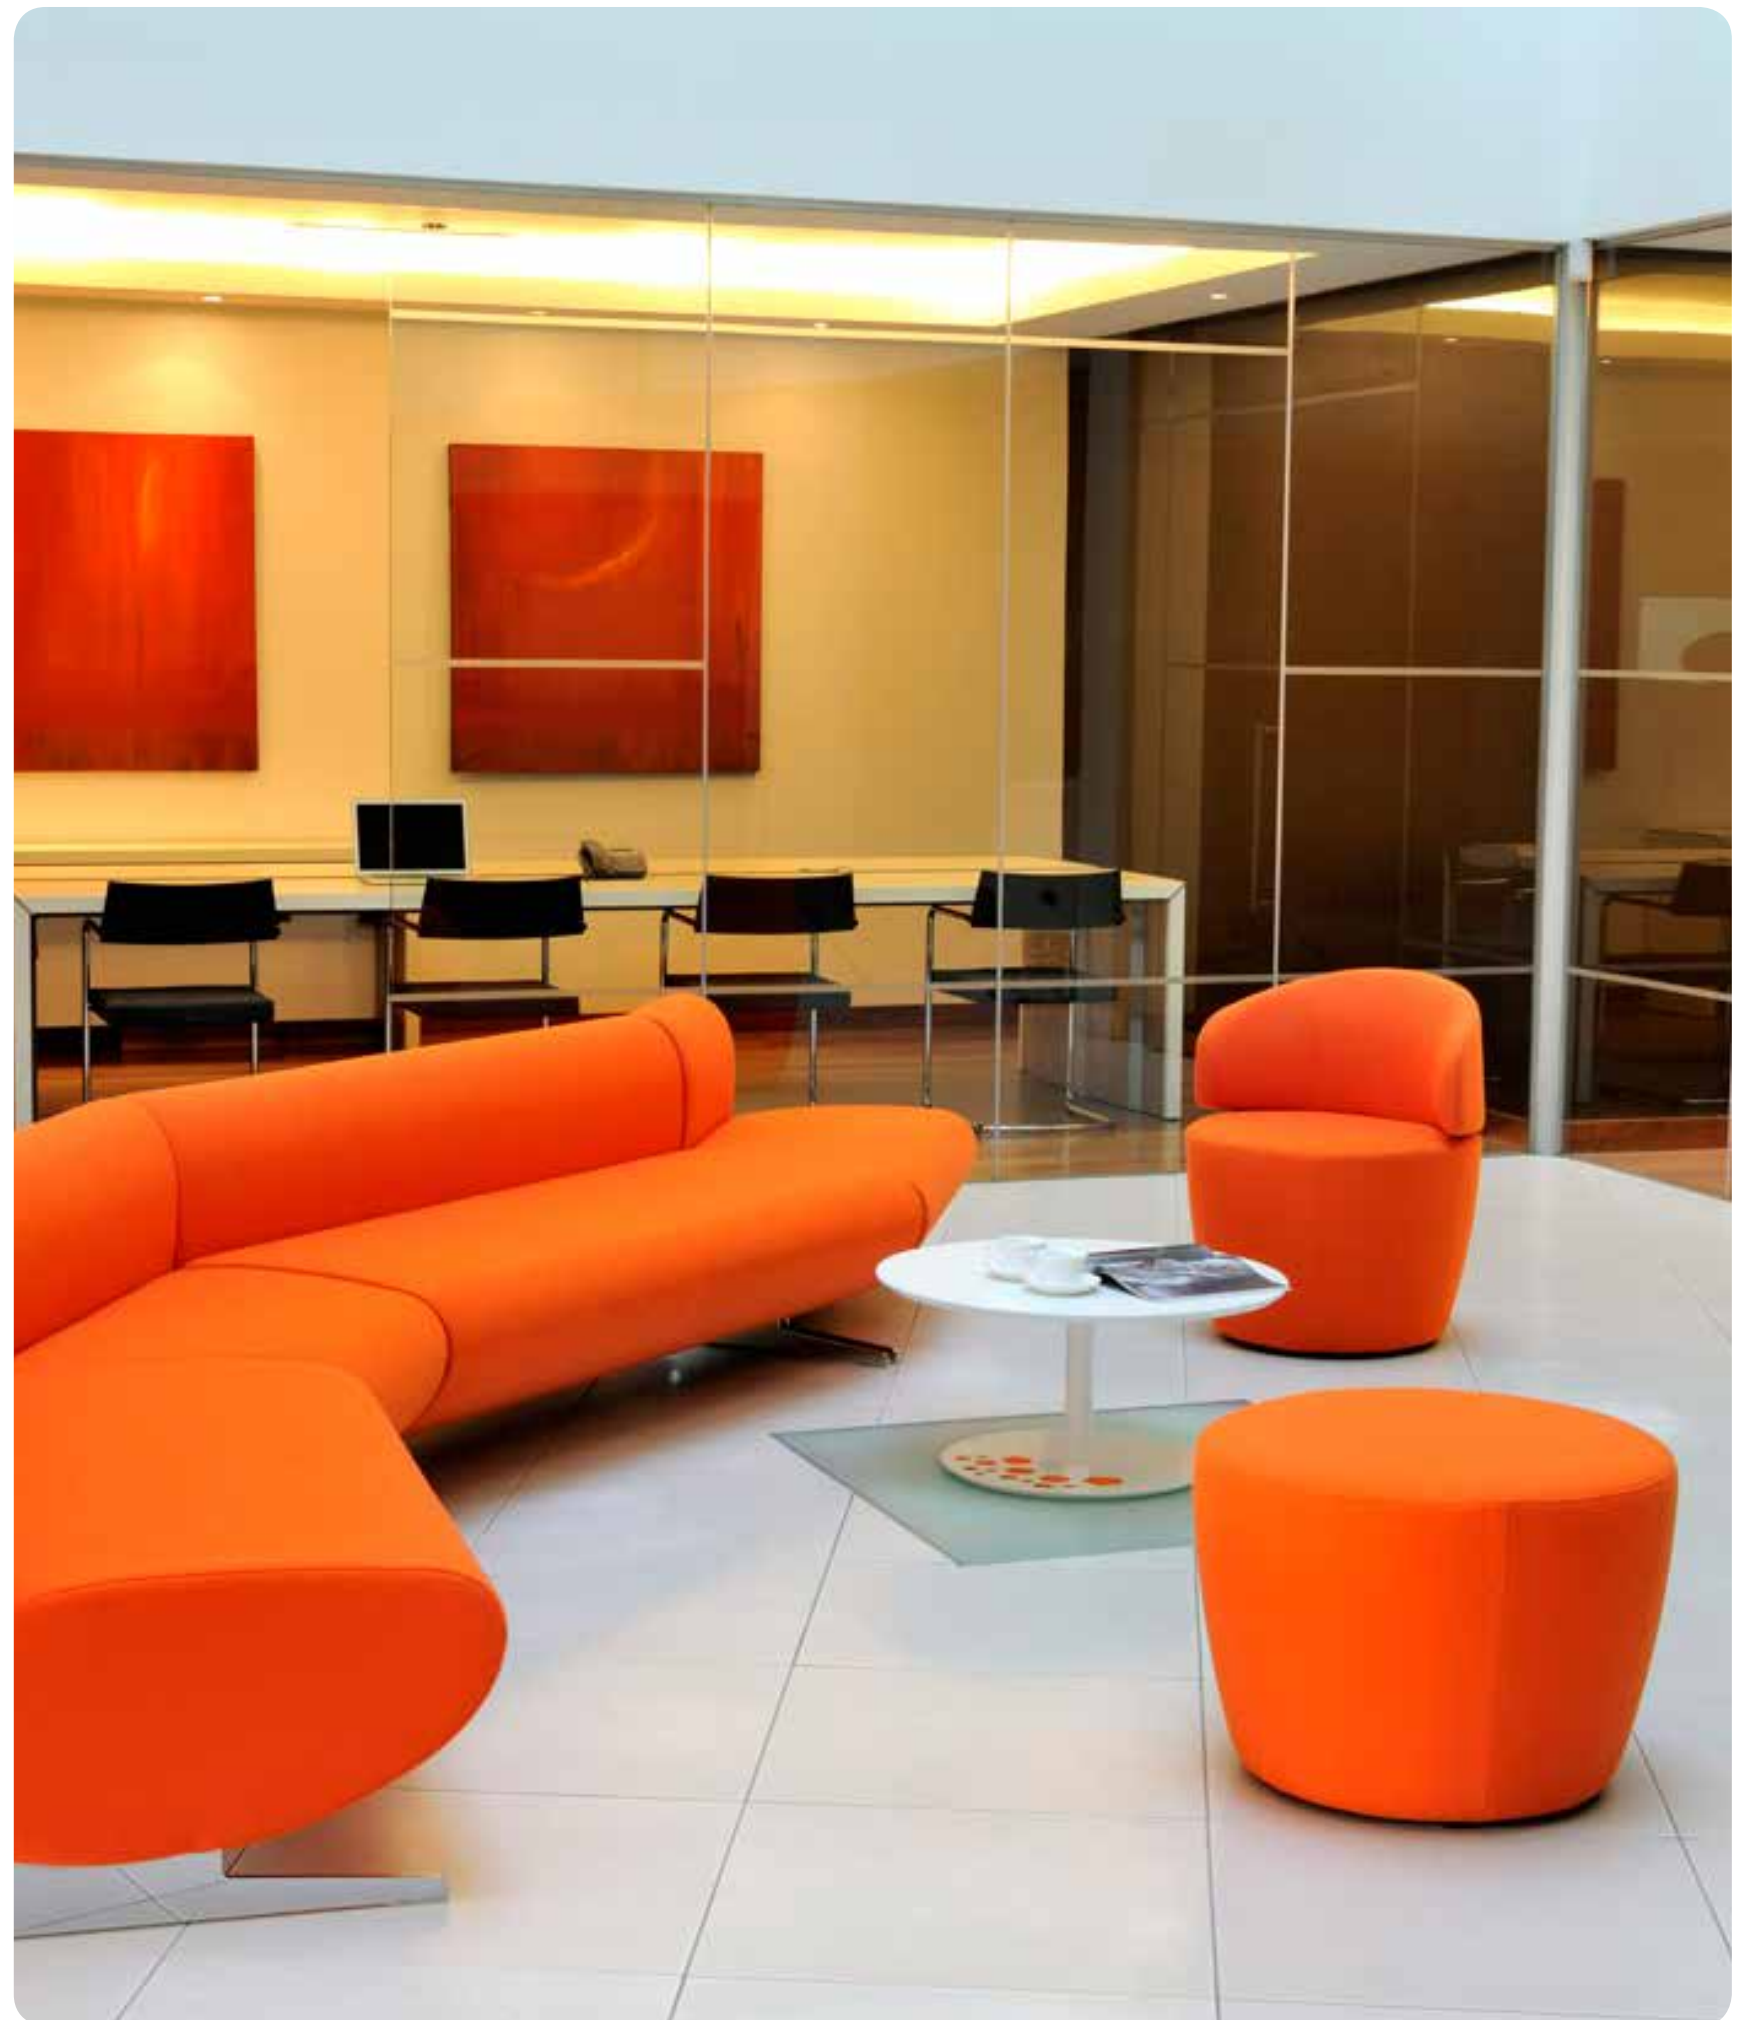

O'val

Designed by David Fox

O'val tub chairs and stools are comfortable space saving seats. The fabric cut-outs of the Asteroid table can be coordinated with O'cee and O'val to create stylish breakout areas.

Features

- Tub chair and stool
- Complementary Asteroid table
- Tub chair available in fabric and vinyl
- Stool available in fabric, leather and vinyl

Stretch

Designed by Ian Marchant

Stretch is the landscape seating range designed to expand into any area. With eight individual pieces, Stretch can be a simple armchair or a collection of multiple units.

Ideal for relaxation or collaboration, Stretch can be configured to define breakout spaces. Each free-standing piece can be fitted with silver, beech or oak legs and two-tone fabric options are available.

Features

- Fully webbed seat
- 8 free-standing modular units: armchair, two-seater and three-seater sofas, left or right arm two-seater and three-seater units, and corner unit
- Available in fabric and vinyl with two-tone fabric options
- Silver, beech and oak leg options

CON1

CON2

CON3

CONSTOOL

Connaught

Connaught is a traditional square-lined sofa and armchair range with the added luxury of deep plump cushioning. Extremely comfortable, Connaught is ideal for corporate or hotel environments. The option of two-tone fabric showcases the Connaught perfectly. The full wooden base is an elegant addition to the range.

Features

Armchair, two and three-seater sofas

Matching footstool

Available in fabric, leather and vinyl, with two-tone options

Chrome or beech leg options

Wooden base is available in oak as standard, but other options are available on request

CHAM1

CHAM3

Chamfer

Designed by Ian Marchant

This stylish tub chair takes its name from its elegant chamfered corners. The Chamfer range offers a chair and matching two-seater sofa. The compact footprint, and option of a swivel-based chair, makes Chamfer the ideal choice for breakout areas and student accommodation. The choice of a white or silver chrome base rail provides the stylish finishing touch to complement fabric choices.

Features

- Chair and two-seater sofa
- Swivel chair option
- Compact footprint
- Available in fabric, leather and vinyl, with two-tone options
- Choice of white or silver brushed chrome base rail

Inca

This fully upholstered tub chair is an ideal addition to any lobby, office or breakout area. Inca is offered with an under seat storage shelf and swing away writing tablet making this a versatile solution to any environment.

Features

- Large front castors
- Optional under seat storage
- Swingaway writing tablet

Zone

Designed by David Fox

Breakout and informal meeting areas can be enhanced by the presence of Zone. Chrome leg, cantilever or round base options are available.

Features

Available with a polished aluminium 4 star base, a chrome cantilever frame or a round pedestal base

Giggle

Designed by Ian Marchant

Inspired by a smile, Giggle is the perfect style statement for a modern hotel, reception or breakout area. Giggle can be supplied with a choice of sledge, crossover skid, four-legged fixed and four-legged auto-return polished chrome frames. The sculptured seat and back offer exceptional support and comfort. The option of Giggle in two-tone fabric creates stunning results.

Features

Choice of sledge, crossover skid, four-legged fixed and four-legged auto-return polished chrome frames

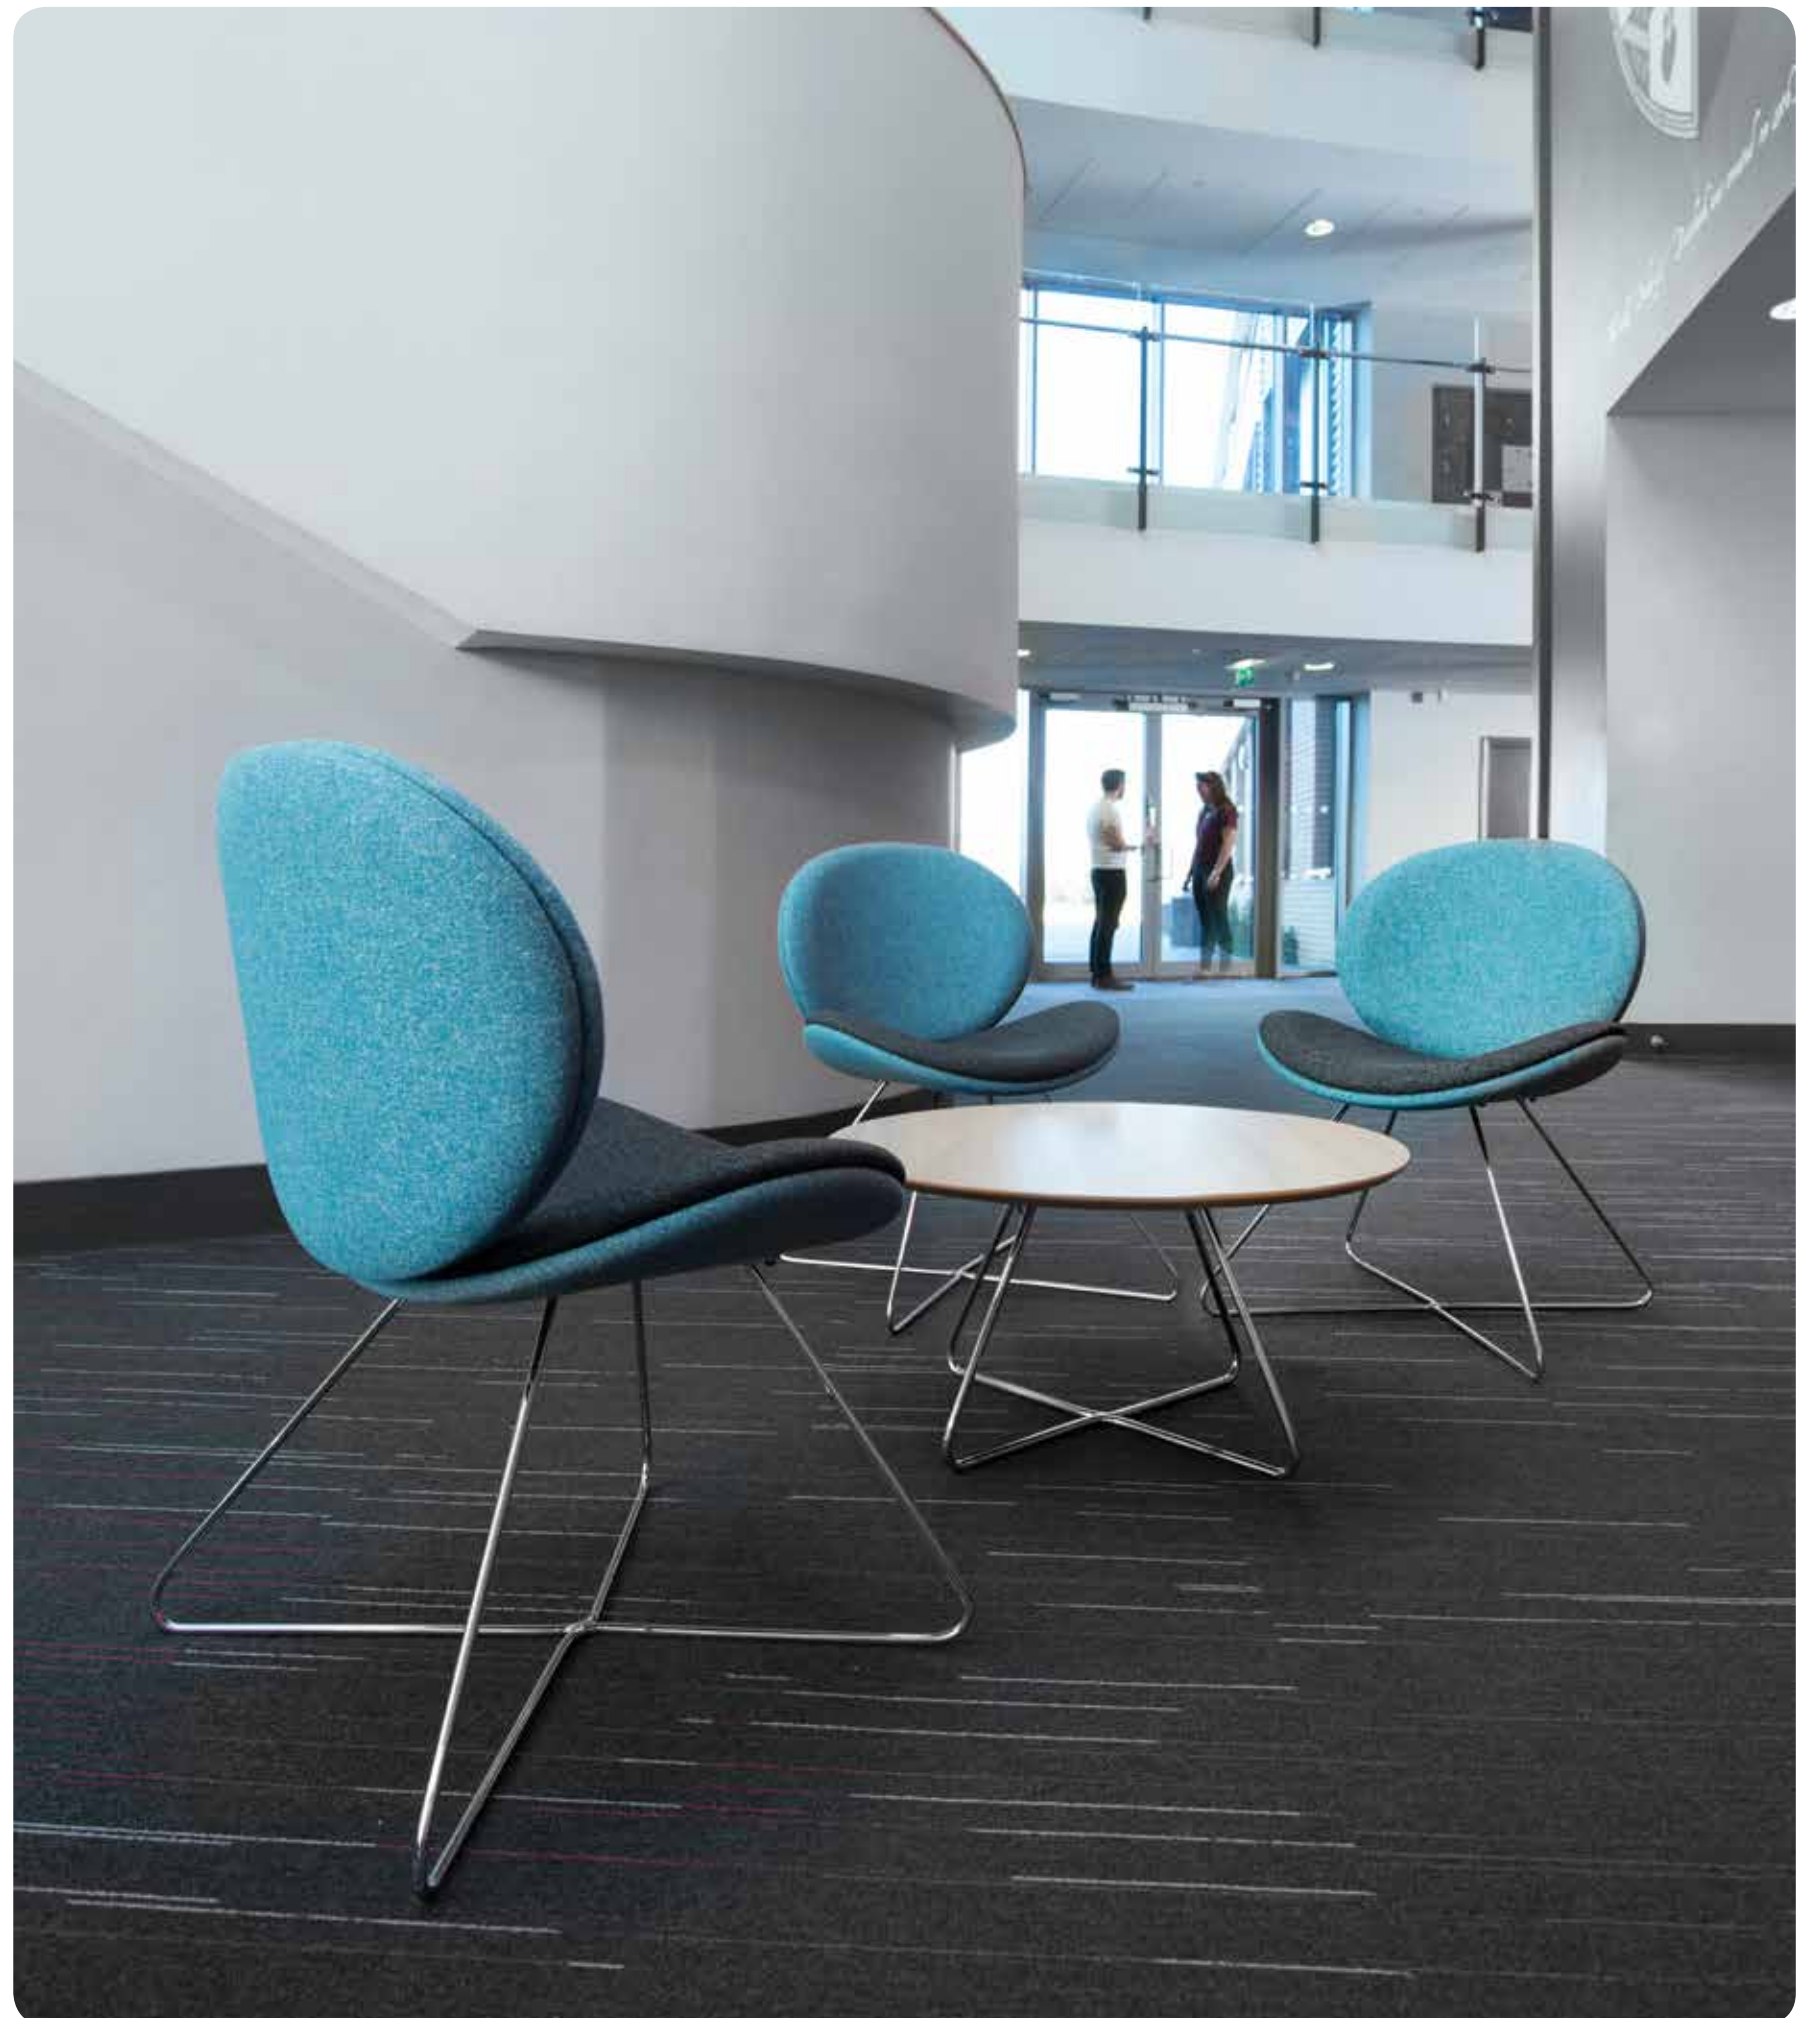

Available in fabric, leather and vinyl, with two-tone options on both seat and back
Complementary crossover skid framed table

GIGGLE2

GIGGLETAB

GIGGLE3

SL1

Solace

Combining a generously proportioned seat with a compact overall footprint, our exclusive Solace range is the versatile seating solution for confined spaces. Exceptionally comfortable, the stylish tub design can be finished with ball foot brushed chrome or sleek polished chrome legs. Striking two-tone fabric options perfectly complement the design.

Features

- Tub chair with compact footprint and generously proportioned seat
- Available in fabric and vinyl, with two-tone options
- Ball foot brushed chrome and polished chrome leg options

VENUS3

VENUS1

Venus

Space saving dimensions combine with stylishly crisp modern design to make Venus the ideal compact tub chair for use in cafés, hotels and other leisure environments. Both the diagonal and the curved chrome frame complement the curvature of the back to create a stylish and practical seating solution.

Features

- Compact chair
- Available in fabric, vinyl and leather with two-tone options
- Diagonal 4-legged and curved 4-legged chrome frame options

Touch

Designed by David Fox

Touch is a family of products with benches, connecting tables, high and low stools and a matching coffee table. Touch benches and connecting tables are simple practical units designed to allow clients the flexibility to use space efficiently. The quality components, such as the thin high tensile steel chrome legs, facilitate the simplicity of the design. The bench and table units are free-standing to ensure total flexibility. Beautifully simple, the modular design means that Touch looks good as a single bench or as a large configuration to dramatically fill an atrium. The Touch coffee table and matching stools offer a stylish solution for informal breakout areas, and the high stools perfectly complement the poseur Asteroid table.

Features

- Free-standing modular units with upholstered benches
- Square, T-point, 3-point and 4-point white MFC connecting tables
- Black composite laminate tables available
- Linking device available
- High tensile steel chrome legs
- Laptop and coffee table
- Low and high upholstered stools
- Available in fabric, leather and vinyl
- Complementary Asteroid tables

Dot, Dash, Morse, Code & Cube

These upholstered stools are the stylish accessory for any contemporary reception, touchdown or breakout area. Dot, Dash, Morse, Code and Cube offer a range of shapes, heights, leg and castor options to suit any requirement.

DASH

CODE/LEG

MORSE/CAST

Features

- Dot, tubular design with optional legs in two styles (height 400mm x width 470mm)
- Dash, square with optional legs in two styles (height 400mm x width 470mm)
- Morse, square with leg or castor options (height 465mm x width 470mm on castors)
- Code, tubular with leg or castor options (height 455mm x width 470mm on legs)
- Cube, (height 500mm x width 465mm)
- All available in fabric, vinyl or leather with two-tone options

Casino

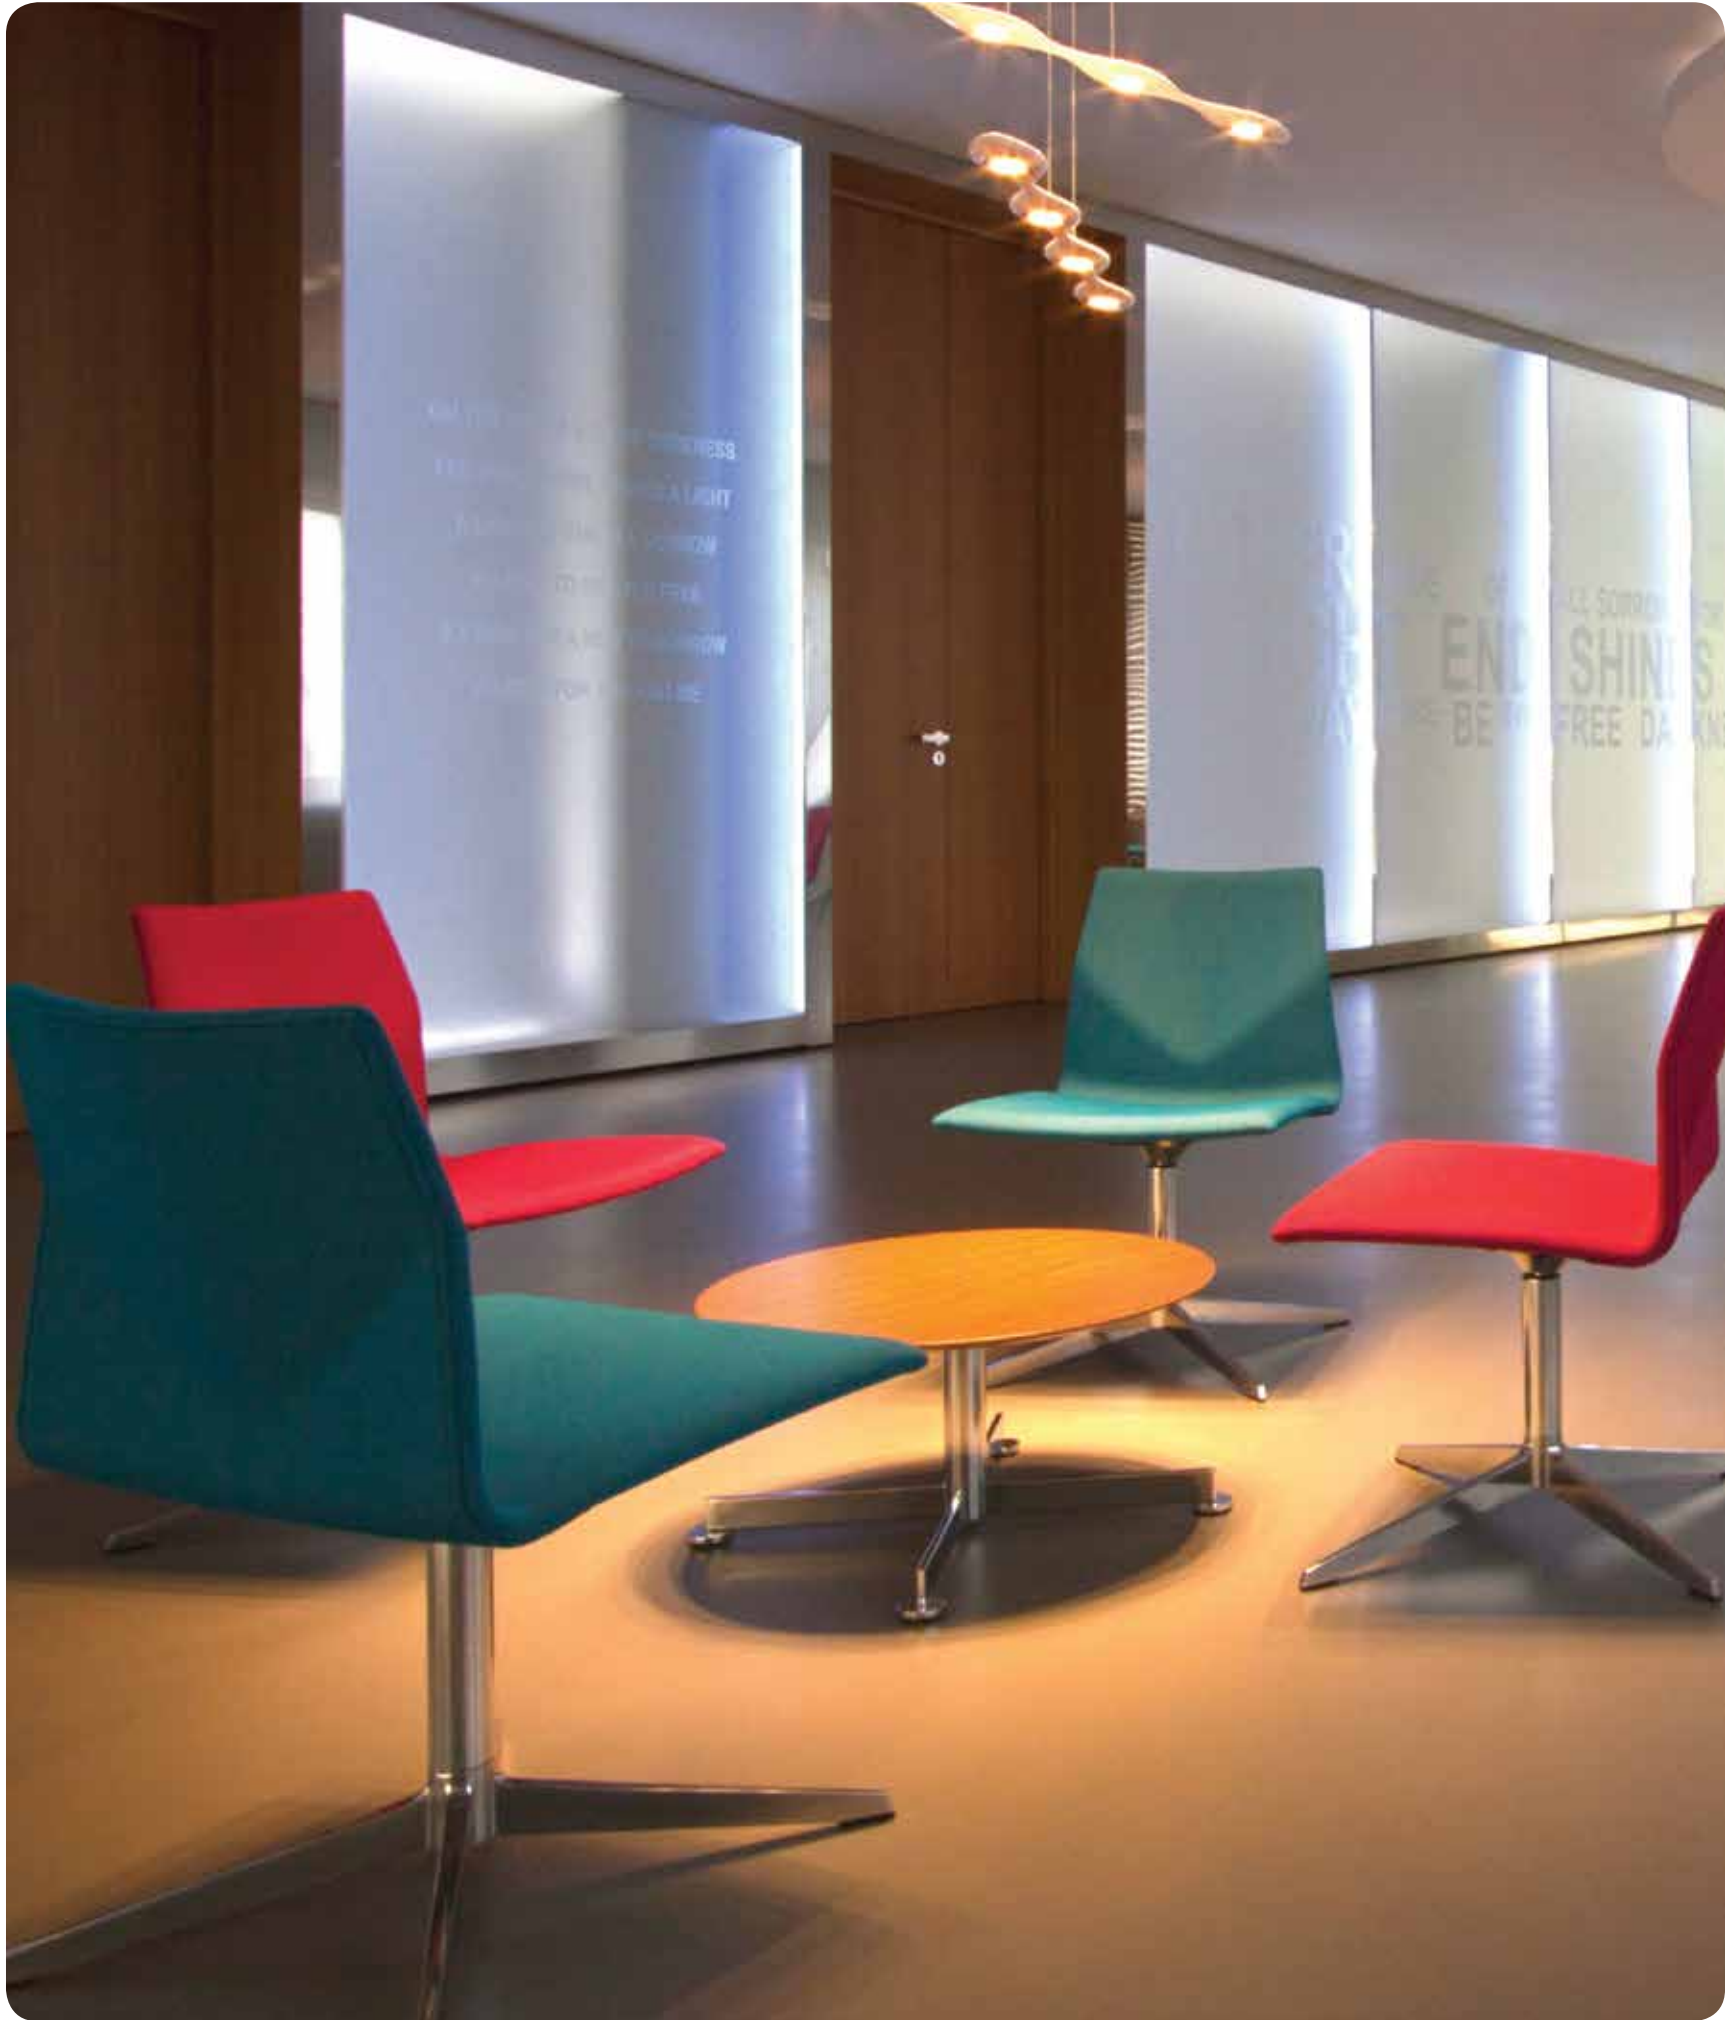

The Casino stool range is a great addition to any open space where touchdown seating allows people to take a break or catch-up with colleagues in an informal environment.

The option of a single or double crescent enables a multitude of configurations to be created. Ball foot brushed chrome or polished chrome legs offer that extra finishing touch.

Features

- Round, 1 crescent & 2 crescent options
- Available in fabric, vinyl and leather
- Available with ball foot brushed chrome or polished chrome legs

FCL01/IL

FourCast Lounge

Features

FourCast Lounge is a fully upholstered swivel lounge chair with freefloat seat/back and return function on a 4-star aluminium base. The addition of the Inno®lounge tablet makes the FourCast Lounge ideal for meeting, informal working or eating areas.

- Fully upholstered
- Swivel base
- Return mechanism
- Freefloat seat/back mechanism
- Weight capacity 112kg
- Optional Inno®lounge tablet with chrome arm
- Black or white powder coated frame options

Sentrum

Designed by Peter Roth

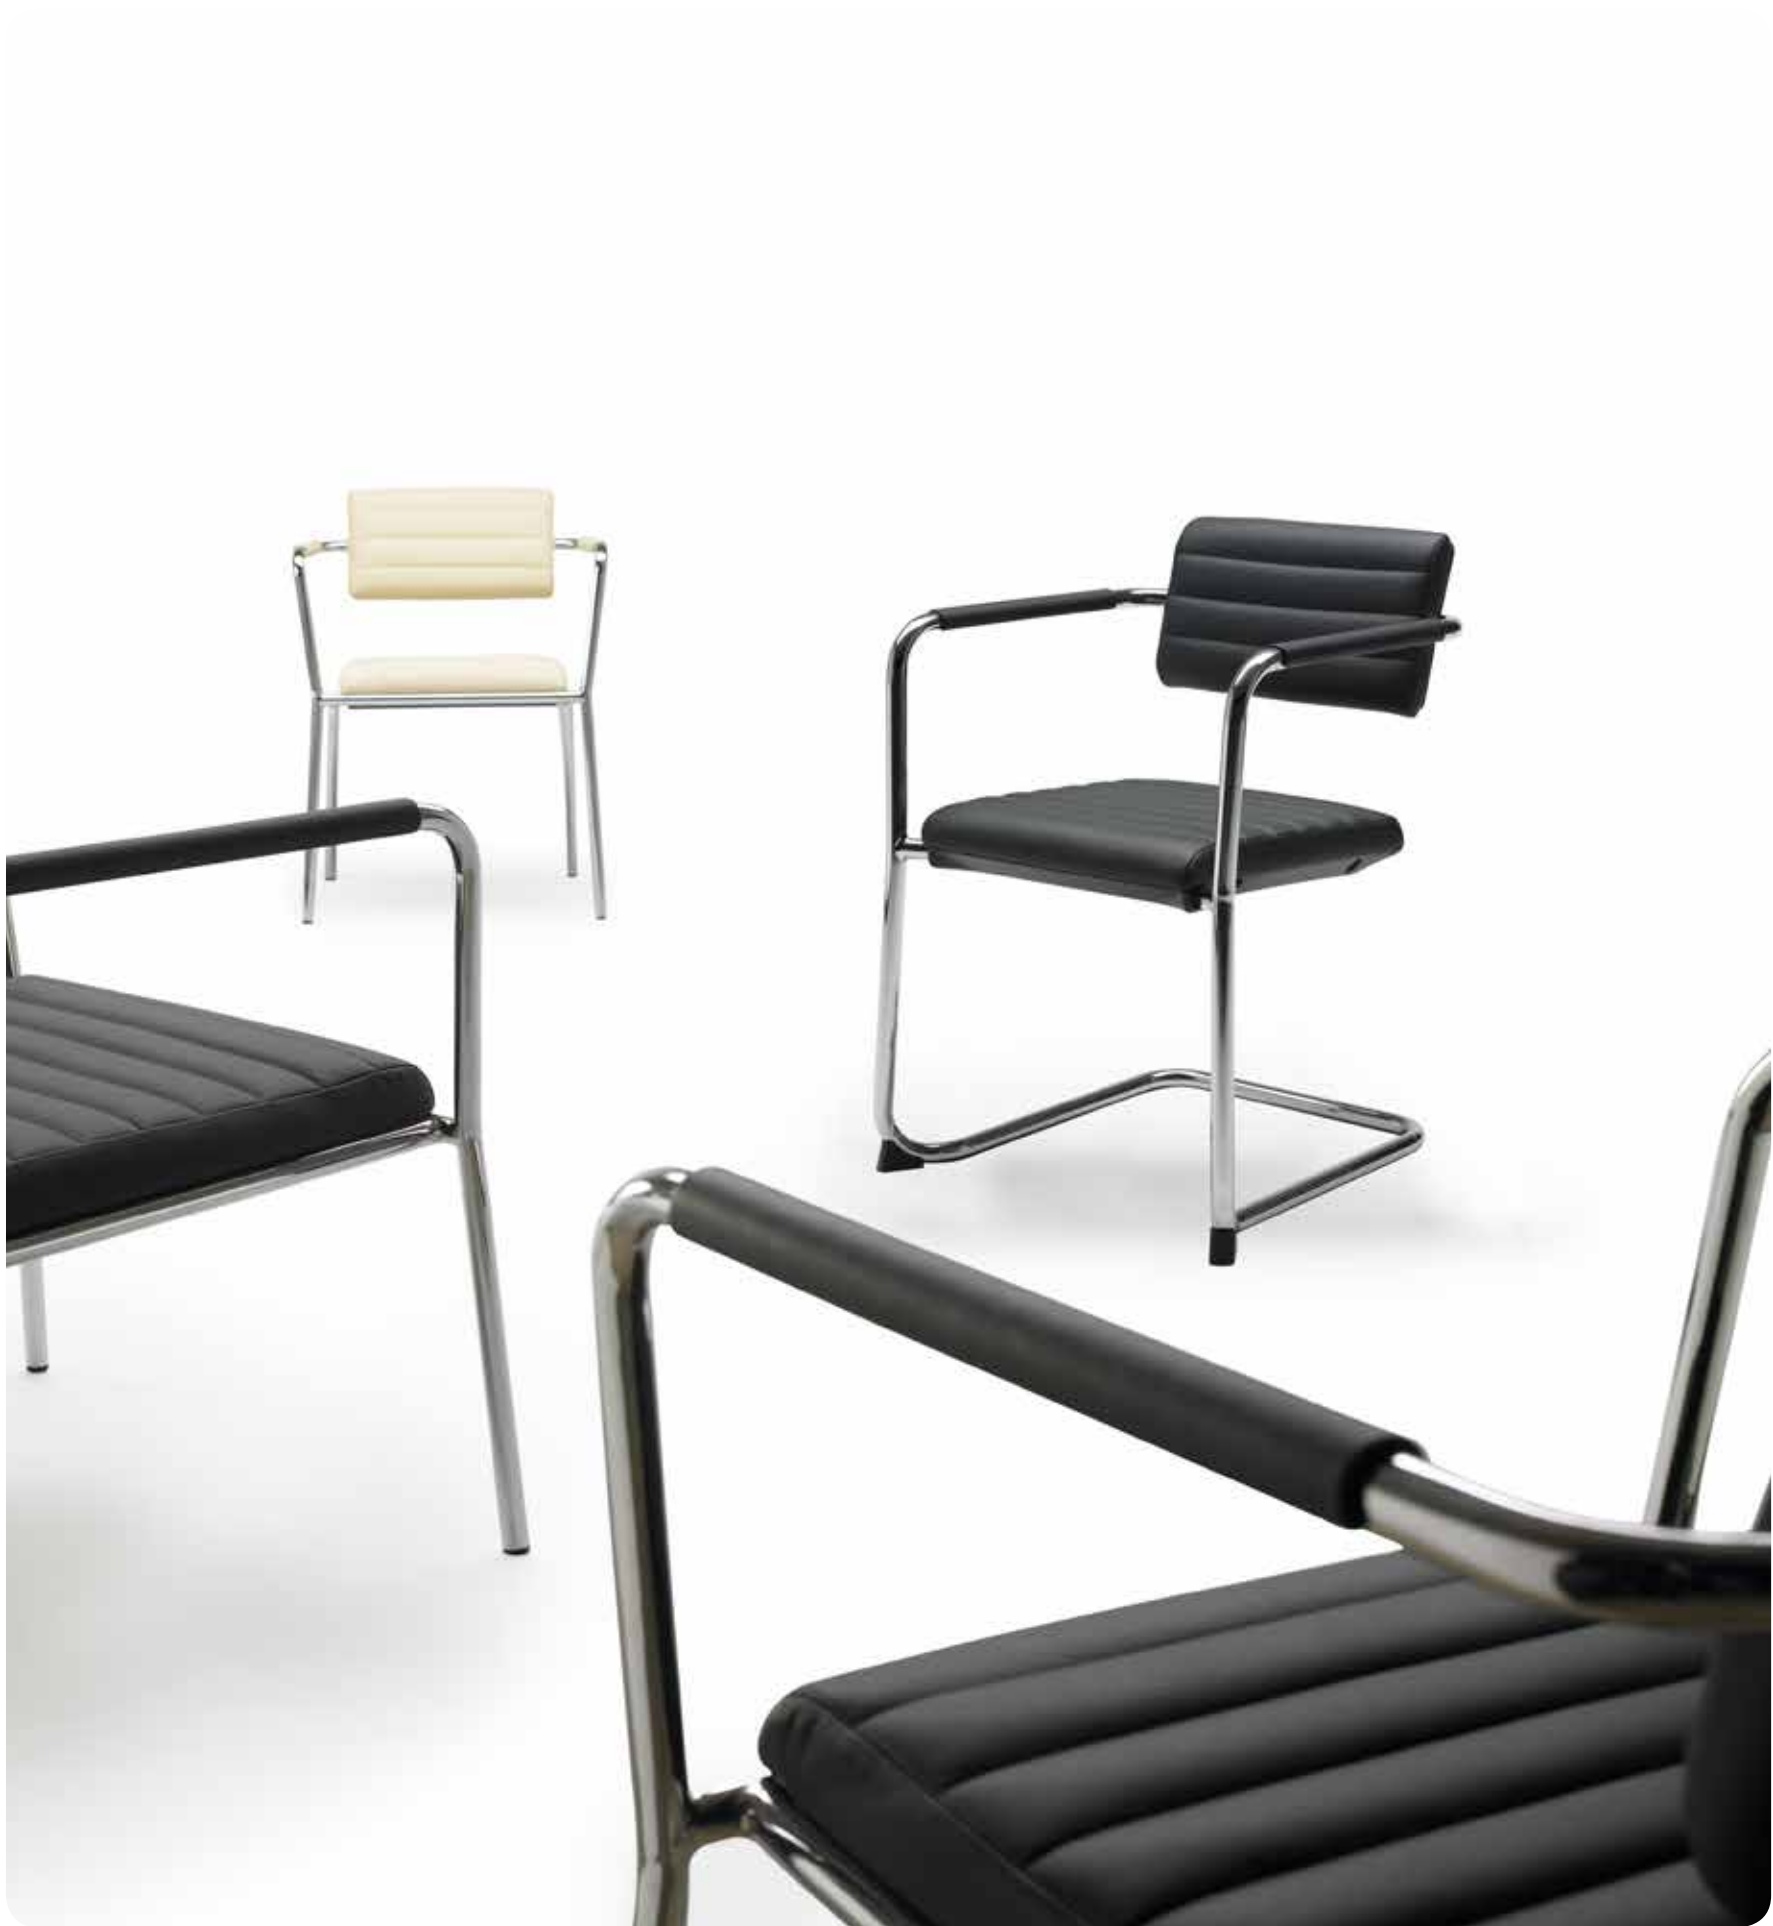

A range of sleek and contemporary chairs to suit any meeting, conference, boardroom or office.

The Sentrum is available as a side chair or an armchair with a cantilever base for maximum comfort. Alternatively there is the '5 star' base with castors and a fully adjustable height and tilt mechanism, ensuring great posture and comfort. The polished aluminium cast arms feature timber pad inserts to coordinate with our natural beech, cherry or walnut high pressure laminate table tops.

Features

- Chrome plated steel frame
- Built in webbed seat
- Innovative knitted stretch mesh upholstery
- Stack up to 6 high

02/4

Tiani

Designed by Simon Pengelly

Tiani provides a suite of multi-purpose chairs for the corporate and leisure contract markets, complimenting contemporary interiors.

Available in leather or a wide selection of fabrics, all models feature a sprung webbed seat and leather covered arms, with the 02/1 and 02/2 incorporating a moulded plastic seatpan to allow seat stacking without marking.

Features
Chrome plated steel frame
Cantilever, four legged or 5 star task base
Ribbed upholstery
Flexible lumbar
Stack up to 5 high

Flair

Designed by Peter Roth

Designed for use in all aspects of conferencing, from the large congress hall facility to the intimate meeting room.

The multi-contoured seat shell offers true comfort while maintaining a compact footprint for maximum numbers. The simple aesthetics and clean lines give architects and designers flexibility to offer a contemporary solution for all environments. The chrome plated frame features a unique flared leg detail.

Features

- Chrome plated steel frame
- Unique flared leg detail
- Stack up to 10 high

Mendola

Designed by Peter Roth

"The Mendola chair with ProBax® Advanced Seating Technology brings a new level of comfort to your events"

The Mendola chair is a contemporary multi-purpose aluminium chair perfect for banquet and conference venues. The design incorporates ProBax® Advanced Seating Technology which has been awarded with the FIRA Innovation Award.

Features

- ProBax® Advanced Seating Technology
- Exclusive lightweight triangular extrusion
- Upholstered multi-contoured shell
- Available with or without arms
- Stack up to 10 high

ProBax®
Advanced Seating Technology

Evosa & Evosa Congress

Designed by Peter Roth

Evosa is the perfect chair for the most prestigious venues. The slender chrome plated steel frame and the option of knitted mesh or upholstered back creates a modern chair of outstanding design and quality.

The slim webbed seat and unique hidden back construction provides enduring comfort while maintaining a light weight chair that can be seat stacked up to 10 for the mesh-back chairs and 8 for the upholstered back chairs.

Evosa is available with or without arms. A powder coated frame can be specified. A separate plastic linking clip and a trolley are available.

Features

- Unique back construction
- Webbed seat
- Light weight frame
- Available with or without arms
- Stack up to 10 high

Meet-U[®]

Table System

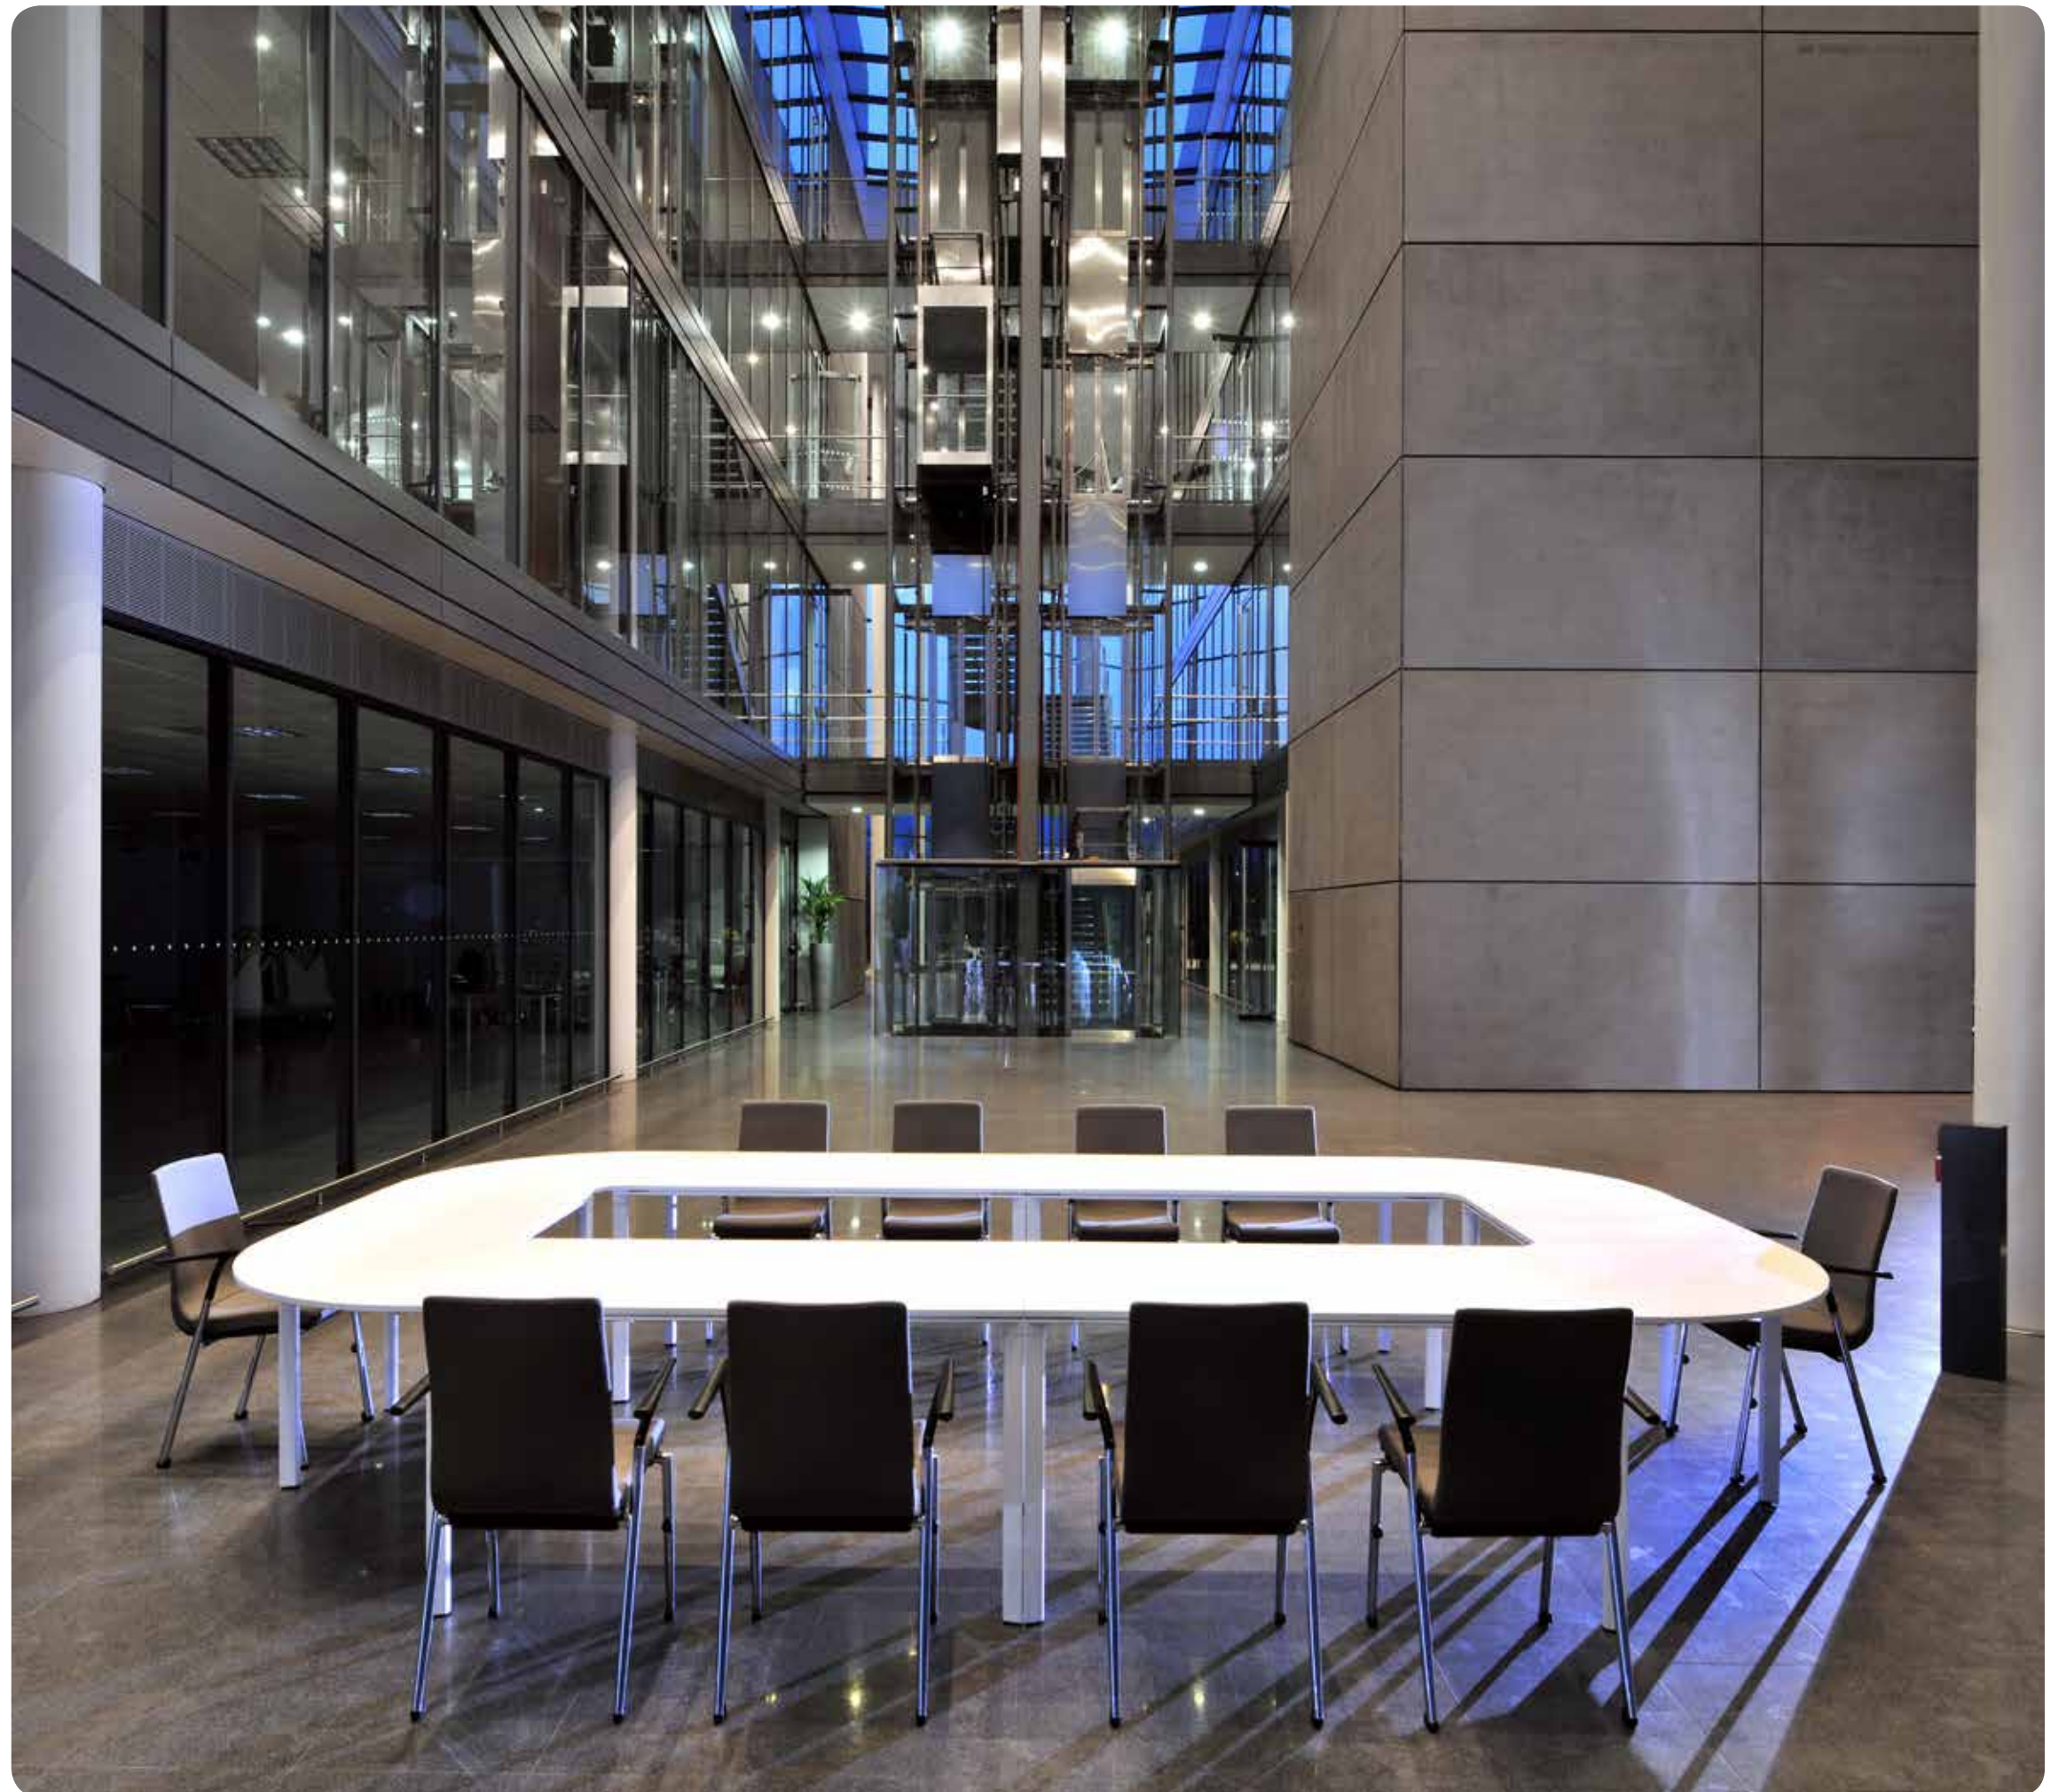

The unique Meet-U[®] table system features a 'tool-free' design of linking fixed tables and bridging tops that ingeniously facilitates different table configurations. An integral rotating corner plate, neatly concealed within the frame, supports bridge tops on two adjacent sides of the table simultaneously. A simple method of extending layouts, bridging tops enhance the sleek and clean design and minimise the number of table legs, allowing more people to sit comfortably.

Meet-U[®] is very easy and quick to assemble and reconfigure. No tooling is required for assembly, apart from the supplied 4mm Allen key. The bridging pieces are also very simple and compact to store when not in use, making the system ideal for environments with changing tabling needs.

The aesthetic design centres on a shadow line along the structure and down the legs. The features are enhanced by the wide variety of finishes and combinations. A neatly formed channel on the underside of the table allows the insertion of a multi-function clip that can be used to secure and support a modesty panel, link tables together and support power cables as a 'cable tidy'. Each table has adjustable levelling legs to ensure stability on any floor surface, and optional castors can be fitted for easy movement. Meet-U[®] tables are also available with a range of power and data connectivity options.

Carefully designed with the user in mind, a variety of top shapes including rectangles, squares, triangles and quadrants, link together to form the perfect layout. The versatility of the Meet-U[®] system means that it is ideally suited to the boardroom, meeting, training and conference room. The wide range of configurations, including the horseshoe, octagonal, rectangular and square, facilitates every type of meeting scenario.

The Meet-U[®] design incorporates a choice of high pressure laminate tops. The frames and legs are constructed of aluminium, which is 95% recyclable, light weight and easily moved.

Meest-U®

Table System

Features

- Table-top manufactured in high pressure laminate
- Available in a very wide variety of colours and finishes

Meest-U[®]

Table System

Features

10 year warranty

Minimum 95% recyclable

Asteroid & Dishy

Occasional Tables

Asteroid & Dishy are tables designed to match signature soft seating ranges. Both feature HPL tops available from our laminated collections.

Dishy offers a round top four-star base and two four-legged oval tables, with either white powder coated or chrome legs.

Asteroid was originally conceived to complement the O'cee and O'val seating ranges, but has become the popular companion to a variety of seating. Available in three heights, the stylish Asteroid is enhanced by colour coordinated fabric cut-outs.

ASTTAB

Asteroid

- HPL top with chamfered edge in a variety of finishes
- 365mm, 720mm and 1050mm high tables
- 750mm diameter top
- Coordinating fabric inlay

DISHYCIRC

DISHYCOFFEE

Dishy

- HPL top with chamfered edge in a variety of finishes
- Chrome or white powder coated bases
- Round 365mm high, 750mm diameter
- 4-legged 365mm high, oval tables 900mm x 600mm and 1200mm x 600mm

Touch & Giggle

Occasional Tables

Giggle and Touch are tables designed to match signature soft seating ranges. HPL tops with chamfered edge in a variety of finishes. Touch and Giggle have bases designed to match designated seating collections, but are commonly combined with other seating.

The Giggle crossover skid frame table is designed to complement our ever popular Giggle chairs. The Touch Coffee table matches the Touch Stools with a simple circular high tensile steel chrome base, and the Touch Laptop table offers a simple working surface for breakout areas.

GIGGLETAB

Giggle

- HPL top with chamfered edge in a variety of finishes
- Chrome crossover skid frame
- 365mm high, 750mm diameter

TOUCH/COFFEE

TOUCH/LAP

Touch

- Coffee table: HPL top with chamfered edge in a variety of finishes

- 350mm high, 750mm diameter
- High tensile steel chrome base

Jupiter & Saturn

Tables with Power and Data Connectivity

Jupiter and Saturn provide convenient power and data connectivity to breakout areas. Saturn is a novel coffee table offered with a walnut or light grey top and a variety of electrical options. Jupiter tables offer three working levels with coffee, meeting and poseur heights. The chamfered edged top can integrate power and data through either a Pixel unit or the stylish domed Pluto.

Jupiter

- 420mm, 715mm and 1095mm height options
- HPL top with chamfered edge in a variety of finishes
- Integrated power module with 3m cable fed through hollow upright
- White or silver base
- Concealed cable restraints
- Provided with Pixel or Pluto domed power and connectivity options
- Further electrical options available on request
- Can be supplied without power

Saturn

- 500mm high table with a 500mm diameter walnut or light grey top
- SATURN/A 1 UK socket individually fused at 3.15A, hardwired with 800mm lead, 1 data (RJ45) outlet and 3m Cat 5e fly lead
- SATURN/B 1 twin USB fast charger (max 2.1A combined) hardwired with 800mm lead

Tubestation

Mobile Power, Data & AV

Tubestation is a versatile data, power and cable management system that neatly and elegantly delivers power and connectivity wherever you need it.

Features

- Optional number of faces for power and data
- Mobile or fixed feet
- Available in white, black or silver
- 160mm diameter
- Robust stove powder coated aluminium construction
- 1200mm height as standard with bespoke sizes available
- Worldwide electrical socket types
- Conforms to BS6396, UL/CSA 60950, EN60950 and CE standards
- Integral screen fixing interface as standard
- Base cover eliminates trip hazards
- Additional items: flat screen monitor supports, CPU holders, supports for video conferencing and AV monitors, worktops, lights and screen systems
- Manufactured to BS5733
- Patent number GB246546
- Power supply and data cabling built in (CAT 5E, CAT 6 and CAT 7)
- Other height, electrical options and colours available
